INTRODUCTION

Founded in 2015, Amase has quickly established itself as a leading name in India's LED lighting industry, with a strong specialization in outdoor lighting solutions. With a focus on quality, innovation, and long-term performance, we design and manufacture a wide range of outdoor lighting products including wall lights, bollard lights, garden lights, and pole lights—each built to enhance architectural aesthetics while withstanding the toughest weather conditions.

What sets Amase apart is our strong in-house manufacturing ecosystem. We design and develop our own custom moulds, giving us complete control over the form, functionality, and finish of every product. Our dedicated surface treatment facility ensures each fixture meets the highest standards of durability, corrosion resistance, and outdoor performance.

At the heart of every Amase light is an efficient, high-quality power supply that ensures optimal energy usage, consistent illumination, and a longer product lifespan. This efficiency not only reduces power consumption but also enhances the reliability of each light across varied applications—from residential landscapes to commercial exteriors.

We believe that delivering great products is only half the job. That's why Amase is equally committed to providing the best after-sales service in the industry. Our support team, backed by a widespread network, ensures timely assistance and complete customer satisfaction long after installation.

With a strong foundation in design, technology, and service, Amase continues to lead the way in sustainable, high-performance outdoor lighting across India.
